## OTOHIME Larval Fish Diet

**Premium Japanese manufactured larval fish diet - Currently recognised as one of the world's best larval finfish diets.**

- **BALANCED DIET**  
ideally suited for virtually all fin fish species
- **AMAZING CLEANLINESS**  
with high shape retention in water
- Contains a high percentage of **QUALITY KRILL MEAL** for better colour enhancement of fish larvae and higher attractiveness

### What's special about OTOHIME?

**OTOHIME** is made from highly-selected raw materials with **easily digested protein** and **high quality lipids** to promote the vitality of fish larvae.

**OTOHIME** has **an excellent balance of DHA, Phospholipid, Vitamins and Minerals** to provide the required nutrients for the fish larvae at their initial growth stage.

**OTOHIME** features  **$\beta$ -glucan-containing yeast cell walls** for the healthy growth of the fish larvae.

A new state of the art material grinder has been installed to achieve smaller and uniformly-sized particles to match European requirements.

**Available from 75 micron upwards.**

Improved production technology makes **excellent dispersibility on water surface** and **ideal sinking speed.**
